

MOKSH SHARMA

AI Automation Specialist • Data Analyst • Freelance Developer
9560879104 | mokshsharma02468@gmail.com | github.com/MokshSharma7 | New Delhi, India

EDUCATION

Qualification	Institution	Score	Year
B.Tech CSE	GGSIPU (Expected 2028)	9.0 CGPA*	2024–28
12th — CBSE	MM Public School	84%	2024
10th — CBSE	MM Public School	93%	2022

FREELANCE EXPERIENCE

AI Automation & Data Analyst • Independent / Agency Work	2023 – Present
- Built lead generation automation workflows for clients using n8n, Make, and Zapier - Developed RAG-based chatbots with client knowledge bases using OpenAI / LangChain - Created Power BI dashboards and Python data pipelines for business analytics - Managed full project lifecycle from requirement gathering to deployment	
AI - Automation • Cognitex	2025 – Present
- Built automation systems and lead generation pipelines with CRM integrations - Assisted in website creation, front-end development, and database management	
Automation & Web Developer • Delvion	2025 – Present
- Developed automation workflows and lead generation systems with API integrations - Contributed to website creation, deployment, and database optimisation	

PROJECTS

MSME Sustainability Data Analysis Tool — Python · Pandas · Matplotlib · Scikit-learn
- Built an ML-backed tool to assess and predict sustainability metrics for MSMEs - Automated data ingestion, cleaning, and feature engineering pipelines using Pandas and NumPy - Applied Scikit-learn models for trend forecasting; visualised insights with Matplotlib
Disaster Safety Ecosystem — Python · Data Analysis · Automation
- Designed a data-driven platform for disaster preparedness and real-time safety planning - Automated alert workflows and integrated multiple data sources for emergency response
Client Automation Workflows — Lead Gen & Chatbots — n8n · Make · LangChain · OpenAI APIs
- Delivered custom lead generation pipelines and CRM integrations for freelance clients - Deployed RAG chatbots with document ingestion, semantic search, and API responses

TECHNICAL SKILLS

Languages: Python, JavaScript, C, C++, HTML, CSS, SQL
Data & ML: Pandas, NumPy, Matplotlib, Scikit-learn, Power BI, MySQL, MongoDB
AI & Automation: n8n, Make (Integromat), Zapier, LangChain, OpenAI APIs, RAG Pipelines
Tools: Git, GitHub, Figma, Vercel, Canva

ACHIEVEMENTS & LEADERSHIP

- **President, AI Club** • GGSIPU — Leading the college AI department, organising workshops, and driving student projects in ML and automation (2024 – Present)
- **Best Delegate** • Model United Nations (2022 – 2023)
